

MEENAKSHI SETHI (SHE/HER)

Jersey City, NJ | msethi.work@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Experienced Data Analyst with 3+ years in data analysis, business intelligence, quantitative analysis and financial modeling. Proficient in Python, SQL, Machine Learning, AWS, Tableau and Excel, with a focus on optimizing processes, workflow automation and actionable insights. Available for immediate joining; no sponsorship required as a STEM OPT eligible.

EDUCATION

Master of Science in Business Analytics | Northeastern University (GPA 3.40)

Dec 2024

Courses: Database Management, Data Analysis & Visualization, Data Mining & Machine Learning, Marketing Analytics, Marketing Research.

Masters in International Business Operations | Indira Gandhi National Open University (GPA 3.44)

Dec 2020

TECHNICAL SKILLS

Programming Languages: • Python • SQL(MySQL) • R • HTML • CSS

Cloud & Data Engineering: • AWS (S3, Lambda, IAM, Glue ETL, Athena, RDS, Redshift, SNS) • Hadoop • Alteryx

Data Visualization: • Power BI • [Tableau](#) • Matplotlib • Seaborn • ggplot2 • Streamlit • Vercel

Financial & Business Tools: • SAP • NetSuite • Cost-Benefit Analysis • Risk Assessment • Optimization-LP • Root Cause Analysis

Project Management & Others: • JIRA • Git/GitHub • MS PowerPoint • Bitbucket • MS Excel (VBA, Pivot Tables, VLOOKUP)

WORK EXPERIENCE

Crossroads of Michigan | Business Data Analyst Intern

May – Aug 2024

- Designed an **18-KPI framework** for six departments, like Client Visits and Grant Revenue, to track and enhance performance.
- Built **Tableau and Excel dashboards** leveraging historic data and growth models to enhance operational efficiency.
- Refined KPIs through **Agile methodology**, including BRD creation, sprint planning, and updating JIRA Epics and User Stories.

Rahi Systems | Data Analyst

Mar – Aug 2023

- Analyzed EMEA revenue trends (YoY, QoQ, MoM) using **Python and SQL**, identifying high-value accounts for retention.
- Built and deployed an automated **ETL pipeline using AWS** (S3, Lambda, Glue, Athena), streamlining data processing, **reducing manual intervention by 80%**, enhancing performance and reliability.
- Delivered SKU-level profit report, implemented consolidated shipping strategy, **boosting 13 projects' profitability by 8%**.

Maersk GSC | Business Intelligence Analyst

Mar – Dec 2022

- Developed **Power BI dashboards** to enhance accounts payable efficiency, **reducing processing turnaround time by 37.5%**.
- Managed month-end accruals and cost control within SAP (SaaS ERP, FICO/MM) for SAI region, ensuring financial reporting.
- Conducted invoice verification, vendor reconciliations, analyzing payments and accruals **using SQL, saving \$97,000**.

Rahi Systems | Financial Analyst

Apr – Sept 2021

- Leveraged **Excel and financial expertise** for profit/CAPEX/OPEX **variance analysis** to support **financial forecasting**.
- Reconciled and validated AP/AR, inventory and accrual data across four international markets, ensuring data integrity and accuracy for financial reporting.

ACADEMIC PROJECTS

Customer Growth Prediction - ThermoFisher Scientific | Alteryx, Python, CatBoost

Sept – Dec 2024

- Enhanced customer growth prediction by developing CatBoost machine learning model, achieving **12% improvement** in recall.
- Cleaned and prepared **large datasets with 2M+ rows** using Alteryx and Python, ensuring data quality for predictive analytics.
- Identified cross-selling opportunities by analyzing large-scale SKU data and recommended complementary products along with investments in digital platforms and field sales to boost customer satisfaction.

Impact of Board Diversity on Branding | Python, Web Scraping, API, Empirical Modeling

Sept – Dec 2024

- Analyzed board diversity and branding data for 10 luxury brands listed on stock exchanges using SEC Form 8-K and tweets.
- Utilized **web scraping, OpenAI API, Python** for data collection, structuring, cleaning, statistical analysis and hypothesis testing.
- Developed an empirical model that **validated the hypothesis (H1)** of a causal relationship between board and branding DEI.

Diabetes Risk Prediction | Python, Pandas, NumPy, Scikit-learn:

July-2024

- Developed predictive model, Logistic Regression to identify high-risk patients, achieving **71.26% accuracy and 74.28% recall**.
- Prioritized recall to reduce false negatives, improving early detection and patient outcomes in healthcare.

CERTIFICATION

AWS Certified Cloud Practitioner, Amazon Web Services (AWS)

Feb 2025

Advanced Certification in Data Science | IIIT – Bangalore

Nov 2022
