

MEENAKSHI SETHI (SHE/HER)

Jersey City, NJ | msethi.work@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Experienced Data Analyst with 3+ years in quantitative analysis, business intelligence, and financial modeling. Proficient in Python, SQL, Machine Learning, AWS, Tableau and Power BI, with a focus on optimizing processes, workflow automation and actionable insights. Available for immediate joining; no sponsorship required as a STEM OPT eligible.

EDUCATION

- Master of Science in Business Analytics | Northeastern University (GPA 3.40)** Dec 2024
Courses: Database Management, Data Analysis & Visualization, Data Mining & Machine Learning, Marketing Analytics, Marketing Research.
- Masters in International Business Operations | Indira Gandhi National Open University (GPA 3.44)** Dec 2020

TECHNICAL SKILLS

- Programming Languages:** • Python • SQL(MySQL) • R • HTML • CSS
- Cloud & Data Engineering:** • AWS (S3, Lambda, IAM, Glue ETL, Athena, RDS, Redshift, SNS) • Hadoop • Alteryx
- Data Visualization:** • Power BI • [Tableau](#) • Matplotlib • Seaborn • ggplot2 • Streamlit • Vercel
- Financial & Business Tools:** • SAP • NetSuite • Cost-Benefit Analysis • Risk Assessment • Optimization-LP
- Project Management & Others:** • JIRA • Git/GitHub • MS PowerPoint • Bitbucket • MS Excel (VBA, Pivot Tables, VLOOKUP)

WORK EXPERIENCE

Crossroads of Michigan | *Business Data Analyst Intern* May – Aug 2024

- Led the development of a Tableau dashboard** for KPI tracking using historic data and growth models, empowering leadership to monitor organizational health.
- Refined KPIs through **Agile methodology**, collaborating on requirement gathering (BRD), sprint planning and updating JIRA Epics and User Stories.

Rahi Systems | *Data Analyst* Mar – Aug 2023

- Utilized **Python** and **SQL** to analyze EMEA **revenue trends** (YoY, MoM, QoQ), identifying the high-value accounts and enabling data-driven retention strategies.
- Automated end-to-end data processing using **AWS (S3, lambda, Glue, Athena)**, eliminating job skips, **reducing manual intervention by 80%** and enhancing performance and reliability.

Maersk GSC | *Business Intelligence Analyst* Mar – Dec 2022

- Developed Power BI dashboards to enhance accounts payable efficiency, **reducing processing turnaround time by 37.5%**.
- Managed month-end accruals and cost control within SAP (SaaS ERP, FICO/MM) for SAI region, ensuring financial reporting.
- Conducted invoice verification, vendor reconciliations, analyzing payments & accruals using SQL, **saving \$97,000**.

Rahi Systems | *Financial Analyst* Apr – Sept 2021

- Leveraged Excel and financial expertise for profit/CAPEX/OPEX **variance analysis** to support **financial forecasting**.
- Reconciled and validated AP/AR, inventory and accrual data across four international markets, ensuring data integrity and accuracy for financial reporting.

ACADEMIC PROJECTS

Customer Growth Prediction - ThermoFisher Scientific | Alteryx, Python, CatBoost Sept – Dec 2024

- Enhanced customer growth prediction by developing CatBoost machine learning model, achieving **12% improvement** in recall.
- Identified cross-selling opportunities by analyzing large-scale SKU data and recommended complementary products.
- Recommended investing in digital platforms and field sales as high-value channels to enhance customer satisfaction.

Impact of Board Diversity on Branding | Python, Web Scraping, API, Empirical Modeling Sept – Dec 2024

- Analyzed board diversity and branding data for 10 luxury brands listed on stock exchanges using SEC Form 8-K and tweets.
- Utilized web scraping, OpenAI API, Python for data collection, structuring, cleaning, statistical analysis and hypothesis testing.
- Developed an empirical model and identified a positive correlation between diverse leadership and branding DEI, supporting the hypothesis.

Diabetes Risk Prediction | Python, Pandas, NumPy, Scikit-learn: July-2024

- Developed a predictive model using Logistic Regression to identify high-risk diabetes patients, achieving **71.26% accuracy and 74.28%**.
- Prioritized recall to reduce false negatives, improving early detection and patient outcomes in healthcare.

CERTIFICATION

Advanced Certification in Data Science | IIIT – Bangalore

Nov 2022
